SUMMARY

Engineering Team Lead and Solution Architect with 13+ years of experience building scalable Python backend systems, cloud-native platforms, and data pipelines. Currently leading a product engineering team at QWY Soft on **QWQER**, a hyperlocal delivery and logistics platform (DMS), with AWS ECS deployments and a GCP BigQuery analytics platform. Proven track record architecting event-driven systems and delivering solutions in fintech (PCI-DSS), IoT, and logistics domains.

SKILLS

Languages: Python, JavaScript, SQL, PHP

Backend: Django, Django REST Framework, Flask, FastAPI, GraphQL, Celery, Django Channels, Daphne (ASGI/WebSockets)

Frontend: Angular (team oversight)

Databases: PostgreSQL, MongoDB, Redis, MySQL, Neo4j

Data & Analytics: PySpark, AWS Athena, AWS Glue, Google BigQuery, Google Pub/Sub

Cloud — AWS: ECS, ECR, RDS, S3, Lambda, EventBridge, API Gateway, DynamoDB

Cloud — GCP: BigQuery, Pub/Sub, Cloud Run, Cloud SQL, Terraform

DevOps: Docker, Docker Compose, GitHub Actions, GitLab CI/CD, Jenkins, SonarQube

Architecture: Microservices, REST APIs, event-driven systems, serverless, CI/CD pipelines

Integrations: ONDC, payment gateways, Shopify, Firebase FCM, ERP sync

ML: Keras, RetinaNet (object detection)

EXPERIENCE

Team Lead / Product Engineer — QWY Soft, Trivandrum

April 2025 – Present

- Lead the engineering team on backend development for **QWQER DMS** (Delivery Management System), a hyperlocal logistics platform handling order lifecycle, rider dispatch, merchant and admin portals, and real-time tracking using **Django, DRF, Celery, PostgreSQL, Redis, and RabbitMQ**.
- Architected and delivered an **order archive pipeline** moving **PostgreSQL** data to **S3 Parquet** with **AWS Glue/Athena** catalog; containerized **PySpark** ETL with idempotent daily incrementals, verification, and safety-gated purge workflows.
- Designed and implemented a **GCP analytics platform: Terraform-provisioned Pub/Sub → BigQuery** event pipeline, real-time **Cloud Run** alert service (FastAPI), and Power BI-ready reporting marts.
- Manage **Docker and AWS ECS** deployments for API, multi-priority Celery workers, and Daphne WebSocket services in **ap-south-1**; maintain **GitHub Actions** CI/CD pipelines for stage, pre-prod, and production environments.
- Led solution design for **geo/dispatch optimization** (grid distance caching, Shapely/GDAL benchmarks) and a **serverless rider notification scheduler** (Lambda, EventBridge, DynamoDB, Firebase FCM).

Python Team Lead — Nuventure Connect, Kochi

March 2023 – March 2025

- Led an **8+ member** cross-functional team on backend API development for **TerraOne**, an IoT platform for pool and irrigation device control; managed server deployment and **GitLab CI/CD** pipeline for Flask microservices (Docker, MongoDB, Redis, Celery).
- Delivered a microservices-based web application with **Angular** frontend and Python backend services.

Python Team Lead — Ndimensionz Solutions Pvt Ltd, Kochi

January 2017 – March 2023

- ♦ Led backend services for **Connected Advisor Platform (CAP)** for data prediction and deep learning (Keras/RetinaNet object detection on insurance documents).
- ♦ Served as Tech Lead on **Dasgateway**, a payment service provider system integrated with multiple banks (PayVision, Bank One, Omnipay) using Django and PostgreSQL.
- ♦ Played a key role in **PCI-DSS auditing** for the payment platform.

Senior Software Engineer / Associate Team Lead — Sesame Software Solutions, Kochi

January 2016 – December 2017

- ♦ Associate Team Lead for **Delinkure**, core banking software for NPA risk management, monitoring, and proactive follow-ups.

Senior Software Engineer — Muble Software Solutions, Kochi

October 2013 – January 2016

- ♦ Developed core Django applications and contributed to an ERP system.

Software Developer — Xminds Infotech Pvt Ltd, Kochi

September 2011 – October 2013

- ♦ Developed PHP-based web applications for various client projects.

PROJECTS

QWQER Analytics Platform

Event-driven analytics on GCP: Pub/Sub topics streaming to BigQuery datasets.

Technologies: Terraform, BigQuery, Pub/Sub, Cloud Run, FastAPI, Cloud SQL

Dasgateway

Payment service provider platform for card payment processing integrated with multiple acquiring banks, with PCI-DSS compliance workflows and secure transaction APIs.

Technologies: Django, PostgreSQL, REST APIs

Connected Advisor Platform (CAP)

Financial advisor platform for service delivery and third-party insurance product analysis with ML-based document processing.

Technologies: Django REST Framework, Flask, Keras (RetinaNet), PostgreSQL, MongoDB, Redis

TerraOne IoT Platform

IoT ecosystem for controlling pool and irrigation devices with REST APIs and microservices.

Technologies: Flask, Docker, GitLab CI/CD, MongoDB, Redis, Celery

EDUCATION

B.Tech — Computer Science — Younus College of Engineering and Technology, Kollam

2005 – 2009
