SUMMARY

Highly skilled Python Developer with 12+ years of experience in developing scalable backend solutions using Django, Flask, and microservices. Proven expertise in deploying applications via Docker, managing CI/CD pipelines, and leading cross-functional teams. Experienced in building and deploying robust APIs, orchestrating cloud-native applications, and optimizing performance in production environments.

TECHNOLOGY SKILLS

Programming Languages: Python, JavaScript, PHP

Web Frameworks: Django, Flask, Angular

Microservices & APIs: REST APIs, Microservices Architecture, API Gateway, Load Balancing

Containerization & Orchestration: Docker (Advanced), Docker Swarm, Kubernetes (Basic)

CI/CD & DevOps: GitLab CI/CD, Jenkins, SonarQube

Cloud Technologies: AWS (EC2, Lambda, S3), DigitalOcean, Azure (Basic)

Databases: PostgreSQL, MySQL, MongoDB

Machine Learning: Keras (Object Detection with RetinaNet)

Other Tools: Redis, Celery, Elasticsearch

EXPERIENCE

Nuventure Connect(Kochi) -Python Team Lead

March 2023 - PRESENT

- Led backend API development for **TerraOne**, an IoT product, and managed the server deployment and GitLab CI/CD pipeline for microservices.
- Led a team in developing a microservices-based web application with Angular for the frontend.

Ndimensionz Solutions Pvt Ltd (Smartcity, Kochi) -Python Team Lead

January 2017 - March 2023

- Spearheaded a fintech automation project, building web services for data prediction and deep learning services.
- Contributed to a payment service provider system, played a key role in **PCI-DSS Auditing**, and led backend integration for **Financepeer**.

Sesame Software Solutions - Senior Software Engineer

January 2016 – December 2017

- Served as Associate Team Lead for **Delinkure**, a core banking software tool for NPA management.

Muble Software Solutions - Senior Software Engineer

October 2013 – January 2016

- Developed a core application and contributed to an ERP system using Django.
- Worked on multiple e-commerce projects as a PHP developer.

Xminds Infotech Pvt Ltd - Software Developer

September 2011 – October 2013

- Developed PHP-based applications for various clients.

EDUCATION

B.TECH / COMPUTER SCIENCE

Younus College of Engineering and Technology, Kollam 2005 – 2009

PROJECTS

TerraOne

IoT ecosystem for controlling pool and irrigation devices.

- **Role:** Led server deployment, REST APIs, and backend services.
- **Technologies:** Flask, Docker, GitLab CI/CD, MongoDB, Redis, Celery.

Connected Advisor Platform (CAP)

Platform for financial advisors to offer services and analyze third-party insurance products.

- **Role:** Team Lead for backend services.
- **Technologies:** Django Rest Framework, Flask, Keras (RetinaNet), PostgreSQL, MongoDB, Redis

Dasgateway system - Payment service provider

Card payment system integrated with multiple banks (PayVision, Bank One, Omnipay).

- **Role:** Tech Lead.
- **Technologies:** Django, PostgreSQL.

Financepeer

Fintech company specializing in education fee financing.

- **Role:** Led backend bank integration for seamless fee management and EMI options.

Nuflights

NDC-based travel content distribution platform.

- **Role:** Backend Developer, integrating new airlines.

Allyyc management (Booking app)

App for booking stays, activities, and events, with Django backend and admin roles.

- **Role:** Associate Lead.
- **Technologies:** Django, MongoDB, Neo4j, Celery.

NPA Management - Delinkure

Core banking software for managing NPA risks, monitoring, and proactive follow-ups.

- **Role:** Tech Lead.
